writing in english german or french more than 300 authors provide a historical description of the beginnings and of the early and subsequent development of thinking about language and languages within the relevant historical context the gradually emerging institutions concerned with the study organisation documentation and distribution are considered as well as those dealing with the utilisation of language related knowledge special emphasis has been placed on related disciplines such as rhetoric the philosophy of language cognitive psychology logic and neurological science

Hydrogeology and Water Quality in the Cedar Rapids Area, Iowa, 1992-96 1998

in the netherlands euthanasia is legal and doctors can openly and intentionally end the life of their patients this book addresses the debate among dutch physicians policy makers lawyers and bioethicists as well as families using academic papers as well as personal
the advantages of airline competition to consumers are clearly apparent lower fares greater choice more frequent flights and a wider range of available services have all been evident when the entry of a new competitor has occurred in many instances however after an initial relatively short lived period of aggressive competition the new entrant has either gone bankrupt or found a less stressful existence co operating in some manner with the incumbent in this wide ranging book the author looks at the competitive arena in the post regulation era and especially focusses on deregulation s legacy globalization in a bilateral world breaking the link between nationality and airlines the book is of special interest to those members engaged in the airline industry regulatory authorities and government departments of transport and industry it will be of value to academic specialists in transport economics and public policy msc students and institutes of
transport pressure groups and the travel and tourism industry

symbolic boundaries cultural differences and ethnic conflicts have gained significance and new meanings in a global situation characterized by the dissolution of traditional political and societal structures. Communications and political and economic interactions increasingly cross the borders of states, nations, and ethnic communities, and yet symbolic borders and separate group identities are nevertheless asserted. The perceived efforts of migrants to maintain their cultural and ethnic identities are often blamed as a cause of conflict within nation states. This intriguing volume recognizes that migrants with an Islamic background are seen as especially problematic. Cases of Turks are the biggest category among Muslim migrants in Europe, and more than one third of all Muslim migrants in Europe are from Turkey. Referring primarily to immigration from Turkey, this book combines both exemplary case studies of Turks within Europe and...
theoretical papers with innovative perspectives on the relations between integration and identity

Mennonite Family History Index 1992-1996
2000-01-01

on the 2nd of January 1719 seventeen year old Abraham Levi launched his grand tour which lasted five years and took him to Germany, Bohemia, Moravia, Austria, and Italy. His travelogue includes descriptions of Jewish communities and their relationship with the surrounding Christian society. This book includes the original Yiddish text, a commentary on the language history, culture, and literature. The introduction comprises discussions on Abraham's biography, the nature of the manuscript, the travelogue in light of the literary genres, and as a historical source and chronology.

History of the Language Sciences / Geschichte
encompasses a variety of topics under the umbrella of pragmatic meaning and cognition this includes theoretical perspectives on pragmatic meaning deixis speech acts and implicature are also covered

Asking to Die: Inside the Dutch Debate about Euthanasia 2017-07-05

chemical modelling applications and theory comprises critical literature reviews of molecular modelling both theoretical and applied molecular modelling in this context refers to modelling the structure properties and reactions of atoms molecules materials each chapter is compiled by experts in their fields and provides a selective review of recent literature with chemical modelling covering such a wide range of subjects this specialist periodical report serves as the first port of call to any chemist biochemist materials scientist or molecular physicist needing to acquaint themselves of major developments in the
area specialist periodical reports provide systematic and detailed review coverage in major areas of chemical research compiled by teams of leading authorities in the relevant subject areas the series creates a unique service for the active research chemist with regular in depth accounts of progress in particular fields of chemistry subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis current subject areas covered are amino acids peptides and proteins carbohydrate chemistry catalysis chemical modelling applications and theory electron paramagnetic resonance nuclear magnetic resonance organometallic chemistry organophosphorus chemistry photochemistry and spectroscopic properties of inorganic and organometallic compounds from time to time the series has altered according to the fluctuating degrees of activity in the various fields but these volumes remain a superb reference point for researchers

Airline Competition: Deregulation's Mixed
this book is the first corpus based description of epistemic stance in conversational american english it argues for epistemic stance as a pragmatic rather than semantic notion showing commitment to the status of information is an emergent interactive activity rooted in the interaction between conversational co participants the first major part of the book establishes the highly regular and routinized nature of such stance marking in the data the second part offers a micro analysis of i think the prototypical stance marker in its sequential and activity contexts adopting the methodology of conversation analysis and paying serious attention to the manifold prosodic cues attendant in the speakers utterances the study offers novel situated interpretations of i think the author also argues for intonation units as a unit of social interaction and makes observations about the grammaticization patterns of the most frequent epistemic markers notably the status of i think as a discourse marker
Identity and Integration 1992

the theme topic interface tti gives a useful catalogue of approaches to the concept theme in the analysis of natural language the book is written with both theoretical and descriptive goals and aims to synthesize and revise current approaches to pragmatic functions in addition tti explains that different thematic constructions in natural language reveal different discourse strategies related to point of view and speaker subjectivity which shows the mutually supportive role of form and discourse function vis á vis each other the book's value is enhanced by the use of natural language corpora the lancaster ibm spoken english corpus libmsec and by running multivariate statistical tests taking into account both segmental and suprasegmental features the bibliography lists more than 600 publications providing ample material for further research into an integrated theory of language and its use the indexes provide easy access to most authors mentioned and to the major concepts covered
International Congress Calendar 2002

This book provides an authoritative survey of the several hundred languages indigenous to North America. These languages show tremendous genetic and typological diversity and offer numerous challenges to current linguistic theory. Part I of the book provides an overview of structural features of particular interest, concentrating on those that are cross-linguistically unusual or unusually well developed. These include syllable structure, vowel and consonant harmony, tone and sound symbolism, polysynthesis, the nature of roots and affixes, incorporation and morpheme order, case, grammatical distinctions of number, gender, shape control, location means, manner, time, empathy, and evidence, and distinctions between nouns and verbs, predicates and arguments, and simple and complex sentences. Part II catalogues the languages by family, listing the location of each language, its genetic affiliation, number of speakers, major published literature, and structural highlights. Finally, there is a catalogue of languages that have evolved in contact situations.
Travels Among Jews and Gentiles 2000-01-01
despite the tremendous number of studies produced annually in the field of dutch art over the last 30 years or so and the strong contemporary market for works by dutch masters of the period as well as the public s ongoing fascination with some of its most beloved painters until now there has been no comprehensive study assessing the state of research in the field as the first study of its kind this book is a useful resource for scholars and advanced students of seventeenth century dutch art and also serves as a springboard for further research its 19 chapters divided into three sections and written by a team of internationally renowned art historians address a wide variety of topics ranging from those that might be considered traditional to others that have only drawn scholarly attention comparatively recently

Pragmatic Meaning and Cognition 2007-10-31
comprehensive coverage of superconductivity from the wiley encyclopedia of electrical and electronics engineering engineering
superconductivity features fifty articles selected from the wiley encyclopedia of electrical and electronics engineering the one truly indispensable reference for electrical engineers superconductor technology has made highly advanced experiments possible in chemistry biochemistry particle physics and health sciences and introduced new applications currently in use in fields from medicine to cellular communications taken together these articles written by acknowledged experts in the field provide the most complete and in depth accounting of superconductivity in existence the book brings together a wealth of information that would not be available to those who do not have access to the full 24 volume encyclopedia this thorough survey looks at the application of superconductors from an engineer’s practical perspective rather than a theoretical approach engineering superconductivity provides full coverage of the fundamentals of superconducting behavior and explains the properties and fabrication methods of commercially produced superconductors up to date material on superconductor applications as well as competing technologies is included the fifty articles presented here are divided into three sections superconductivity and magnetism superconductors applications and related technology engineering superconductivity is a complete and
up to date reference for engineers physicists chemists materials scientists and anyone working with superconductors

**Chemical Modelling 2003-12-19**

the ongoing discussions about globalization american hegemony and september 11 and its aftermath have moved the debate about the export of american culture and cultural anti americanism to center stage of world politics at such a time it is crucial to understand the process of culture transfer and its effects on local societies and their attitudes toward the united states this volume presents germany as a case study of the impact of american culture throughout a period characterized by a totalitarian system two unusually destructive wars massive ethnic cleansing and economic disaster drawing on examples from history culture studies film radio and the arts the authors explore the political and cultural parameters of americanization and anti americanism as reflected in the reception and rejection of american popular culture and more generally in european american relations in the american century
a modified linear estimation approach was performed to reconstruct current sources within the heart based on MRI data sets. The boundary element method was used to create tailored multicompartment models of the human thorax, which were used to solve the forward problem of magnetocardiography. The ability of the proposed method was demonstrated for the localization of a single current dipole as an example of a focal source by means of introducing small shiftings to all reconstruction dipoles during linear estimation solution as well as performing a successive focussing strategy ignoring places without significant electrical activity. The method could easily be extended to the reconstruction of real 3D sources based on a special minimum norm solution. The source volume can be estimated applying a finite element approximation using cube elements. The size of an extended current source can be estimated by superimposing the reconstructed dipoles to an equivalent dipole and comparing the corresponding volume with the sphere which would be related to the equivalent dipole the deviation
of these volumes can be taken as a criterion for non dipolarity of sources

**The Theme–Topic Interface 2001-06-07**

This is the first ever documented study of the 1,035 identifiable Greek city states poleis of the archaic and classical periods c. 650–325 BC. Previous studies of the Greek polis have focused on Athens and Sparta and the result has been a view of Greek society dominated by Sophokles, Plato's and Demosthenes' view of what the polis was. This study includes descriptions of Athens and Sparta but its main purpose is to explore the history and organization of the thousand other city states. The main part of the book is a regionally organized inventory of all identifiable poleis covering the Greek world from Spain to the Caucasus and from the Crimea to Libya. This inventory is the work of 47 specialists and is divided into 46 chapters each covering a region. Each chapter contains an account of the region, a list of second-order settlements, and an alphabetically ordered description of the poleis. This description covers such topics as polis status, territory, settlement pattern, urban center, city walls, and monumental architecture.
population military strength constitution alliance membership colonization coinage and panhellenic victors the first part of the book is a description of the method and principles applied in the construction of the inventory and an analysis of some of the results to be obtained by a comparative study of the 1035 poleis included in it the ancient greek concept of polis is distinguished from the modern term city state which historians use to cover many other historic civilizations from ancient sumeria to the west african cultures absorbed by the nineteenth century colonializing powers the focus of this project is what the greeks themselves considered a polis to be

The Languages of Native North America 2000

an understanding of genres in communication written and spoken is essential to professional success this volume studies situationally appropriate responses in professional communication in face to face interaction and distance communication from a socio cognitive point of view a traditional rhetorical approach does not give much insight in the ways in which genres are embedded in communicative activity or how actors draw upon genre knowledge to perform effectively however if
genres are considered as embedded in social interaction as typified forms of typified circumstances the rich dynamic aspects of genre knowledge can be disclosed the chapters deal with genre knowledge in various settings illustrating the impact of time place medium skills and purpose and some chapters deal with genre analysis in a broader sense giving ideas for applied genre analysis the book is of interest to professionals and scholars in communication studies discourse analysis and social and cognitive science

Psychiatric Services 2017-07-05

this innovative book tells the fascinating tale of the long histories of violence punishment and the human body and how they are all connected taking the decline of violence and the transformation of punishment as its guiding themes the book highlights key dynamics of historical and social change and charts how a refinement and civilizing of manners and new forms of celebration and festival accompanied the decline of violence pieter spierenburg a leading figure in historical criminology skillfully extends his view over three continents back to the middle ages and even beyond to the stone
age ranging along the way from murder to etiquette from social control to popular culture from religion to death and from honor to prisons every chapter creatively uses the theories of norbert elias while also engaging with the work of foucault and durkheim the scope and rigor of the analysis will strongly interest scholars of criminology history and sociology while the accessible style and the intriguing stories on which the book builds will appeal to anyone interested in the history of violence and punishment in civilization

The Ashgate Research Companion to Dutch Art of the Seventeenth Century 2001-05-02

what makes people cosmopolitan how is cosmopolitanism shaping everyday life experiences and the practices of ordinary people making use of empirical research cosmopolitanism in practice examines the concrete settings in which individuals display cosmopolitan sensibilities and dispositions illustrating the ways in which cosmopolitan self transformations can be used as an analytical tool to explain a variety of identity outlooks and practices the manner in which both past and
present cosmopolitanisms compete with meta narratives such as nationalism multiculturalism and religion is also investigated alongside the employment of cosmopolitan ideas in situations of tension and conflict with an international team of contributors including ulrich beck steven vertovec rob kroes and natan sznaider this book draws on a variety of intellectual disciplines and international contexts to show how people embrace and make use of cosmopolitan ideas and attitudes

**Engineering Superconductivity 2005**

maude is a language and system based on rewriting logic in this comprehensive account you ll discover how maude and its formal tool environment can be used in three mutually reinforcing ways as a declarative programming language as an executable formal specification language and as a formal verification system examples used throughout the book illustrate key concepts features and the many practical uses of maude

for the past 25 years the cade conference has been the major forum for the presentation of new results in automated deduction this volume contains the papers and system descriptions selected for the 17th international conference on automated deduction cade 17 held june 17 20 2000 at carnegie mellon university pittsburgh pennsylvania usa fifty three research papers and twenty system descriptions were submitted by researchers from fteen countries each submission was reviewed by at least three reviewers twenty four research papers and fteen system descriptions were accepted the accepted papers cover a
variety of topics related to theorem proving and its applications such as proof carrying code cryptographic protocol verification model checking cooperating decision procedures program verification and resolution theorem proving the program also included three invited lectures high level verification using theorem proving and formalized mathematics by John Harrison scalable knowledge representation and reasoning systems by Henry Kautz and connecting bits with floating point numbers model checking and theorem proving in practice by Carl Seger abstracts or full papers of these talks are included in this volume in addition to the accepted papers system descriptions and invited talks this volume contains one page summaries of four tutorials and five workshops held in conjunction with CADE 17

An Inventory of Archaic and Classical Poleis 2000

economic growth and the environment is a complex and much debated issue per Kågeson’s book has a broader approach than earlier studies on this subject as he relates the analysis of present day problems and
trends 1960 2010 to clearly defined long term objectives based on the concept of sustainable development the present volume covers the use of non renewable resources in the oecd countries in a global perspective while the regional environmental impact of economic growth is discussed in a european context the book also includes an analysis of the potential conflict between pollution abatement costs and economic growth

Analysing Professional Genres 2013-08-22

includes four thematic essays and nine sections in which specific types of objects are discussed and complete catalogue on the dvd

Violence and Punishment 2012-12-28

der 2 teilband behandelt detailliert und oft unter neuen blickwinkeln die einzelnen entwicklungsstufen des sprachstudiums als autonome disziplin von der wachsenden erkenntnis von genetischen beziehungen zwischen sprachfamilien im 17 und 18 jahrhunderts bis zur etablierung der komparativ historisch ausgerichteten indo germanistik im 19
Cosmopolitanism in Practice 2007-07-19

fourteen specialists from across the European Union discuss current issues regarding Middle Eastern and North African immigrants in Europe focusing on topics such as immigration legislation, assimilation, integration, multiculturalism, community formation, citizenship, political participation and religious and cultural identities. This book was previously published as a special issue of the journal Immigrants and Minorities.

All About Maude - A High-Performance Logical Framework 1991

A biographical record of contemporary achievement together with a key to the location of the original biographical notes.
the early english impersonal construction aims to demonstrate that an understanding of the functional and semantic aspects of impersonal verbs in old and middle english can shed light on questions that remain about these verbs today.

Automated Deduction - CADE-17 2012-12-06

publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews

Growth versus the Environment: Is there a Trade-off? 2005

this book is an expression of how the different memories of different gendered experiences affected the jews attitudes towards modernity focusing on three geographical centers pre war and wartime europe the united states and israel the fifteen articles provide a backdrop to
understanding the variation of jewish life and identity
