Roman Tombs and the Art of Commemoration 2019-04-18 explores four key questions around Roman funerary customs that change our view of the society and its values.

Miscellanea astronomica ossia raccolta di articoli pub. dalla Specola vaticana in diversi giornali scientifici ... 1924 through a study of tombs and burial customs in Rome and its surroundings, this volume demonstrates that the third century was an exciting period of experimentation and creativity that continued to be a driving force in all social classes, paving the way for the new system of late antiquity.

Crisis and Ambition 2013-10-03: A companion to Roman art encompasses various artistic genres, ancient contexts, and modern approaches for a comprehensive guide to Roman art offers comprehensive and original essays on the study of Roman art contributions from distinguished scholars with unrivaled expertise covering a broad range of international approaches focuses on the socio-historical aspects of Roman art covering several topics that have not been presented in any detail in English, includes both close readings of individual art works and general discussions, providing an overview of main aspects of the subject and an introduction to current debates in the field.

A Companion to Roman Art 2019-11-04: The Roman empire was home to a fascinating variety of different cults and religions: its enormous extent the absence of a precisely definable state religion and different exchanges with the religions and cults of conquered peoples and of neighboring cultures resulted in a multifaceted diversity of religious convictions and practices. This volume provides a compelling view of central aspects of cult and religion in the Roman empire among them the distinction between public and private cult, the complex interrelations between different religious traditions, their mutually entangled developments and expansions, and the diversity of regional differences between religious texts and artefacts.

Religion in the Roman Empire 2021-10-06: In recent years, a debate has arisen concerning the convenience of conserving subterranean cultural heritage and the necessary management models. There is often pressure from local authorities more interested in using the cultural heritage sites in order to develop the economy and the tourism industry rather than in the conservation of the cultural heritage.

The Conservation of Subterranean Cultural Heritage 2014-10-24: Inscriptions are for anyone interested in the Roman world and Roman culture whether they regard themselves as literary scholars, historians, archaeologists, anthropologists, religious scholars, or work in a field that touches on the Roman world from c. 500 BCE to 500 CE and beyond. The goal of the Oxford Handbook of Roman Epigraphy is to show why inscriptions matter and to demonstrate to classicists and ancient historians their graduate students and advanced undergraduates how to work with epigraphic sources.

The Oxford Handbook of Roman Epigraphy 2015: Temples are the most prestigious buildings in the urban landscape of ancient Italy emerging within a network of centres of the then known Mediterranean world. Notwithstanding the fragmentary condition of the buildings, these monuments and especially their richly decorated roofs are crucial sources of information on the constitution of political social and craft identities acting as agents in displaying the meaning of images. The subject of this volume is thematic and includes material from the Eastern Mediterranean, including Greece and Turkey. Contributors discuss the network between patron elites and specialized craft communities that were responsible for the sophisticated terracotta decoration of temples in Italy between the sixth and first centuries BCE focusing on the mobility of craft people and craft traditions and techniques asking how images, iconographies, practices, and materials can be used to explain the organization of ancient production distribution and consumption. Special attention has been given to relations with the Eastern Mediterranean, including Greece and Anatolia, investigating craft communities, workshop organizations, and networks. This period has never been thoroughly undertaken for this period and region nor for this exceptionally rich category of materials or for the craftspersons producing the architectural terracottas. This volume aims to improve our understanding of roof production and construction in this period to reveal relationships between main production centres and to study the possible influences of immigrant craftspersons.

Deliciae Fictiles V. Networks and Workshops 2019-09-16: Between 270 and 535 AD, the city of Rome experienced dramatic changes. The once glorious imperial capital was transformed into the much humbler centre of Western Christendom. In a process that redefined its political importance, size, and identity, urban space and aristocratic power in late antique Rome examines these transformations by focusing on the city's powerful elite, the senatorial aristocracy, and exploring their involvement in a process of urban change that would mark the end of the ancient world and the birth of the Middle Ages in the eyes of contemporaries and modern scholars. It argues that the late antique history of Rome cannot be described as merely a product of decline instead it was a product of the dynamic social and cultural forces that made the city relevant at a time of unprecedented historical changes.
offers a detailed examination of aspects of city life as diverse as its administration public building rituals housing and religious life to show how the late roman aristocracy gave a new shape and meaning to urban space identifying itself with the largest city in the mediterranean world to an extent unparalleled since the end of the republican period

**Miscellanea Astronomica** 1924 the appraisal of the political dialogue and negotiations with the communist regimes of east central europe commenced by the holy see in the 1960s did not provoke only lively debates among contemporaries but remains to the present day one of the most debated questions of the twentieth century history should it be assessed as a fixed path to which no alternative existed or was it a flawed initiative which merely served the international legitimacy of the communist totalitarian system this volume enriches the results of earlier historiography with new perspectives and confirms inter alia that a black and white reading often based on a one sided use of sources of ostpolitik is incorrect just as the critical assessment which frequently places local considerations at the forefront requires revision the at times apologetic outlook defending the vatican s eastern policy is also untenable only a nuanced and source focused analysis of the ambitions of the roman and muscovite centers and of local politics and churches as well as dialogue between the various research trends can help us to gain a more thorough knowledge of and make us better understand those fixed paths upon which the roman and local ecclesiastics of the era were forced to travel and which limited the possibility of success

**La Basilica di San Pietro in Vaticano: Atalante** 2000 the changing attitude of catholic culture towards modernity after decades of a problematic if not plainly hostile approach to modernity by catholic culture the 1960s marked the beginning of a new era as the church employed a more positive approach to the world voices in the catholic milieu embraced a radical perspective channeling the need for social justice for the poor and the oppressed the alternative and complementary world views of universalism and liberation would drive the engagement of catholics for generations to come shaping the idea of international community in catholic culture because of its traditional connection with the papacy and because of its prominent role in the map of european progressive catholicism italy stands out as an ideal case study to follow these dynamics by locating the italian scenario in a broader geographical frame universalism and liberation offers a new vantage point from which to investigate the social and political relevance of religion in an age of crisis

La Basilica di San Pietro in Vaticano: Atalante 2000 throughout their shared history orthodox and eastern catholic churches have lived through a very complex and sometimes tense relationship not only theologically but also politically in most cases such relationships remain to this day indeed in some cases the tension has increased in july 2019 scholars of both traditions gathered in stuttgart germany for an unprecedented conference devoted to exploring and overcoming the division between these churches this book the first in a two volume set of the essays presented at the conference explores historical and theological themes with the goal of healing memories and inspiring a direct dialogue between orthodox and eastern catholic churches like the conference the volume brings together representatives of these churches as well as theologians from different geographical contexts where tensions are the greatest the published essays represent the great achievements of the conference willingness to engage in dialogue general openness to new ideas and opportunities to address difficult questions and heal inherited wounds
The Vatican «Ostpolitik» 1958-1978 2017-04-06T00:00:00+02:00 the chapters brought together in this volume build on the idea that in the 1970s 1980s the global language of human rights contributed to stimulating ideas of reform in the communist world the protagonists were mikhail gorbachev and the italian communists the experience of the pci was in many ways a peculiar case but one that was linked to underground ideas of cultural change even in eastern europe and the soviet union gorbachev's ascent signalled a fundamental shift as he rejected the approach of reducing human rights to an ideological battleground and instead made it the centrepiece of a universalist relaunch by exploring the encounter between reform communists and human rights the authors reconstruct the metamorphosis and the end of communism within the context of the wider transformations taking place in europe political cultures at the end of the cold war
