increasing one's confidence in making decisions or taking action, we consider the following methodological principles to be important for developing high-quality evaluations giving due consideration to methodological aspects of evaluation quality in design, focus, consistency, reliability, and validity. Balancing scope and depth in multilevel multisite evaluands dealing with institutional opportunities and here we introduce the idea of evaluation and some of the major terms and issues in the field. Definitions of evaluation probably the most frequently given definition is evaluation is the systematic assessment of the worth or merit of some object. This definition is hardly perfect. Evaluation distinguished from monitoring, performance management, audit, and accreditation. Monitoring performance indicators, PIS, and broader performance management processes have proliferated across the public, private, and increasingly the not-for-profit sectors in the last few decades. Teaching evaluation evaluators come from diverse cultural, ethnic, and community backgrounds bringing to the profession a wide variety of experiences, training, and skills. Currently, there is no official licensing body for evaluators; however, many higher learning organizations offer programs or courses in evaluation to prepare students for evaluation. Evaluation is a process that critically examines a program. It involves collecting and analyzing evaluation standards. Part of our commitment to better evaluation is making sure that evaluation itself is evaluated better. Like any intervention, evaluations can be evaluated in different ways. There can be evaluative thinking early on in the planning stages to identify priorities and potential consequences of doing an evaluation and training. A training and evaluation outline is a proponent developed summary document that provides performance and proficiency standards for individual and collective
