This chapter gives an outlook on ethics and provides a discussion of some relevant concepts that may deepen the understanding of the text in ethical codes and provide assistance in solving ethical dilemmas and challenges. Here we take a brief look at 1 utilitarianism, 2 deontology, 3 social justice and social contract theory, and 4 virtue theory. We are leaving out some important perspectives such as general theories of justice and rights and feminist thought about ethics and patriarchy.

Ethical perspectives

5 When deciding whether or not to impose or loosen regulations, take decisions about raising rural highway speed limits. For instance, states have the option of maintaining the 55 mile per hour limit or selecting from a range of higher speeds. Raising speed limits produces immediate benefits, reduced travel and delivery times. First, let's define ethical or ethics: ethics are the moral principles or values that govern an individual's behavior. Second, let's define perspective: a perspective is a person's particular attitude toward something or his her unique point of view. Perspective can change everything.

The primary ethical perspectives:

Finally, it identifies several best practices of ethical organizations providing both positive and negative examples of each organizational practice. The purpose of this chapter is not necessarily to provide a comprehensive overview of ethical theory and practice. Several other books cover ethical lenses. If our ethical decision-making is not solely based on feelings, religion, law, accepted social practice, or science, then on what basis can we decide between right and wrong?

Good and bad philosophers, ethicists, and theologians have helped us answer this critical question. Ethical practice: building trust by role modeling ethical behavior and applying principles and values consistently in decision-making. Ethical values provide the moral compass by which we live our lives and make decisions. Doing the right thing because it's the right thing to do.

Care ethics perspective:

Care ethics focuses primarily on relationships between people: those who care for and those who are cared for. Philosophers who defined this particular lens, such as Nel Noddings, have argued that it is a set of moral principles that aim to prevent research participants from being harmed by the researcher and the research process. Ethical and moral responsibility is essential in any research but when it comes to cross-cultural research, it is even more important.
Researchers deal with individuals who have been exploited who are more marginalised and vulnerable in so many ways.
