my book description is related to events i myself have suffered but here told to me from another point of view this view is in relation to the main character wendell where he is telling of his set of events where between myself and wendell we share a special relationship where i am able to relate to him as a peer specialist given into intense discussion where we both agree on what is to be submitted herein there being that all facts do not fall far from the tree from which it came concerning those facts of any given event what you should note is that we ve changed names places and graphic details in order to protect not only wendell s social well being but those being questioned in this book who for their own reasons do not wish to be apart of the nature of what s being told however being that i am the voice for wendell in any case that otherwise he is not able to explain himself is what we hope together that you will find most important and what we desire you to take from this book being that the story is not as important to the individual more than the event as it did indeed occur why because the event is the matter of traumatic reasons by which all other cause and effect factors exist where it would relate to anyone in their perspective lives be it by their own or someone else they may actually know what we mean by this is to express the true premise of this books defining nature as it relates to all such factors leading to the following as being mental health variations substance abuse variations and finally physical abuse being the major and minor cause and effect factor relative to the 2 mentioned above essentially you will take a sad and horrifying look into the mind of wendell where supposedly he existed not as a whole and complete child as he evolved later on in his mid teenage years to where now after so many years of him living with this unfortunate tale about his life where wendell has found the courage to tell while it is my position to help him achieve it along the way
