materials are discussed as well as their properties and means of modifying them. Manufacturing processes and the concepts dealing with producing quality products are also covered. Disorder and instability are matters of continuing public concern. Terrorism as a threat to global order has been added to preoccupations with political unrest and crime. Such considerations have prompted the return to the classic anthropological issues of disorder and disorder. Examining order within the political and legal spheres and in contrasting local settings, the papers in this volume highlight its complex and contested nature. Displays of order seem necessary to legitimize the institutionalization of violence by military and legal establishments. Yet violent behavior can be incorporated into the social order by the development of boundaries, rituals, and established processes of conflict resolution. Order is said to depend upon justice; yet injustice legitimates disruptive protest. Case studies from Siberia, India, Indonesia, Tibet, West Africa, Morocco, and the Ottoman Empire show that local responses are often inconsistent in their valorization, acceptance, and condemnation of disorder. The chronicle of the Guayaki Indians is Pierre Clastres's account of his 1963-64 encounter with this small Paraguayan tribe. A precise and detailed recording of the history, ritual myths, and culture of this uniquely vanished people, determined not to let the slightest detail escape him or to leave unanswered the many questions prompted by his personal experiences. Clastres follows the Guayaki in their everyday lives. Now available for the first time in a stunningly beautiful translation by Paul Auster, Clastres's account radically alters not only the Western academic conventions in which other cultures are thought but also the discipline of political anthropology itself. Clastres's chronicle of the Guayaki Indians was awarded the Alta Prize in Nonfiction by the American Literary Translators Association. This book explores the historical formation during the colonial period of that part of African law known as customary law. Kojirō Karatani's Transcritique introduces a startling new dimension to Immanuel Kant's transcendental critique by using Kant to read Karl Marx and Marx to read Kant in a direct challenge to standard academic approaches to both thinkers. Karatani's transcritical readings discover the ethical roots of socialism in Kant's critique of pure reason and a Kantian critique of money in Marx's Capital. Karatani reads Kant as a philosopher who sought to wrest metaphysics from the discredited realm of theoretical dogma in order to restore it to its proper place in the sphere of ethics and praxis. With this as his own critical model, he then presents a reading of Marx that attempts to liberate Marxism from longstanding Marxist and socialist presuppositions in order to locate a solid theoretical basis for a positive activism capable of gradually superseding the trinity of capital, nation, and state. For years, Matthew Greene and Daniel Rosen have enjoyed a quiet domestic life together in Northampton, Massachusetts. Opposites in many ways, they have grown together and made their relationship work. But when they learn that Daniel's twin brother and sister-in-law have been killed in a bombing in Jerusalem, their lives are suddenly utterly transformed. In dealing with their families and the need to make a decision about who will raise the deceased couple's two children, both Matthew and Daniel are confronted with challenges that strike at the very heart of their relationship. What is Matthew's place in an extended family that does not completely accept him, or the commitment he and Daniel have made? How do Daniel's questions about his identity as a Jewish man affect his life as a gay American? Tensions only intensify when they learn that the deceased parents wanted Matthew and Daniel to adopt the children. Six-year-old Gal and baby Noam...

Gary Bailey's *How to Win Motocross* 1974-01: The posthumous publication in French of archaeology of violence in 1980 gathered together Clastres's final groundbreaking essays and the opening chapters of the book he had begun before his death in 1977. Elaborating upon the conclusions of such earlier works as *Against the State*, Clastres turns around the analysis of power among South American Indians and rehabilitates violence as an affirmative act meant to protect the integrity of their societies and presents us with a generalalogy of power in a native state for him. Tribal societies are not Rousseauist in essence; to the contrary, they practice systematic violence in order to prevent the rise in their midst of this cold monster. The state only by waging war with other tribes can they maintain the dispersion and autonomy of each group in the same way tribal chiefs are not all powerful. To the contrary, they are rendered weak in order to remain dependent on the community. In a series of groundbreaking essays, Clastres turns around the analysis of power among South American Indians and rehabilitates violence as an affirmative act meant to protect the integrity of their societies. These savages are shrewd political minds who resist in advance any attempt at globalization.
