Guided Reading

2017

much has been written on the topic of guided reading over the last twenty years but no other leaders in literacy education have championed the topic with such depth and breadth as irene fountas and gay su pinnell in the highly anticipated second edition of guided reading fountas and pinnell remind you of guided reading s critical value within a comprehensive literacy system and the reflective responsive teaching required to realize its full potential now with guided reading second edition re discover the essential elements of guided reading through a wider and more comprehensive look at its place within a coherent literacy system a refined and deeper understanding of its complexity an examination of the steps in implementation from observing and assessing literacy behaviors to grouping in a thoughtful and dynamic way to analyzing texts to teaching the lesson the teaching for systems of strategic actions a rich text base that can support and extend student learning the re emerging role of shared reading as a way to lead guided and independent reading forward the development of managed independent learning across the grades an in depth exploration of responsive teaching the role of facilitative language in supporting change over time in students processing systems the identification of high priority shifts in learning to focus on at each text level the creation of a learning environment within which literacy and language can flourish through guided reading students learn how to engage in every facet of the reading process and apply their reading power to all literacy contexts also check out our new on demand mini course introducing texts effectively in guided reading lessons

Understanding by Design

2005

what is understanding and how does it differ from knowledge how can we determine the big ideas worth understanding why is understanding an important teaching goal and how do we know when students have attained it how can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high stakes standards based environment authors grant wiggins and jay mctighe answer these and many other questions in this second edition of understanding by design drawing on feedback from thousands of educators around the world who have used the ubd framework since its introduction in 1998 the authors have greatly revised and expanded their original work to guide educators across the k 16 spectrum in the design of curriculum assessment and instruction with an improved ubd template at its core the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks readers will learn why the familiar coverage and activity based approaches to curriculum design fall short and how a focus on the six facets of understanding can enrich student learning with an expanded array of practical strategies tools and examples
from all subject areas the book demonstrates how the research based principles of understanding by design
apply to district frameworks as well as to individual units of curriculum combining provocative ideas
thoughtful analysis and tested approaches this new edition of understanding by design offers teacher designers
a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for
students and teachers alike

The Negro Motorist Green Book

2011-10-05

the idea of the green book is to give the motorist and tourist a guide not only of the hotels and tourist homes in
all of the large cities but other classifications that will be found useful wherever he may be also facts and
information that the negro motorist can use and depend upon there are thousands of places that the public
doesn't know about and aren't listed perhaps you know of some if so send in their names and addresses and the
kind of business so that we might pass it along to the rest of your fellow motorists you will find it handy on
your travels whether at home or in some other state and is up to date each year we are compiling new lists as
some of these places move or go out of business and new business places are started giving added employment
to members of our race

Encyclopedia of the Sciences of Learning

2022-07-19

over the past century educational psychologists and researchers have posited many theories to explain how
individuals learn i.e. how they acquire organize and deploy knowledge and skills the 20th century can be
considered the century of psychology on learning and related fields of interest such as motivation cognition
metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten
over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of
psychology and epistemology beyond folk psychology and its naïve theories of learning psychological learning
theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning
theories cognitive learning theories constructivist learning theories and social learning theories learning
theories are not limited to psychology and related fields of interest but rather we can find the topic of learning
in various disciplines such as philosophy and epistemology education information science biology and as a result
of the emergence of computer technologies especially also in the field of computer sciences and artificial
intelligence as a consequence machine learning struck a chord in the 1980s and became an important field of
the learning sciences in general as the learning sciences became more specialized and complex the various
fields of interest were widely spread and separated from each other as a consequence even presently there is
no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on
which researchers rely the encyclopedia of the sciences of learning provides an up to date broad and
authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields
including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and
knowledge engineering this modern compendium will be an indispensable source of information for scientists
educators engineers and technical staff active in all fields of learning more specifically the encyclopedia
provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage
of the most important theories within the various fields of the learning sciences and adjacent sciences and
communication technologies supplies clear and precise explanations of the theoretical terms cross references to
related entries and up to date references to important research and publications the encyclopedia also contains
biographical entries of individuals who have substantially contributed to the sciences of learning the entries are
written by a distinguished panel of researchers in the various fields of the learning sciences
