**Julius Caesar's Bellum Civile and the Composition of a New Reality 2016-03-09**

In his *Commentaries on the Civil War* (Bellum Civile), Julius Caesar sought to re-invent his image and appear before his present and future readers in a way which he could control and at times manipulate. Offering a new interpretation of the Bellum Civile, this book reveals the intricate literary world that Caesar creates using sophisticated techniques such as a studied choice of vocabulary, rearrangement of events, use of indirect speech, and more. Each of the three books of the work is examined independently to set out the gradual transformation of Caesar's literary persona in step with his ascent in the real world. By analysing the work from Caesar's viewpoint, the author argues that by adroit presentation and manipulation of historical circumstances, Caesar creates in his narrative a different reality in which his conduct is justified. The question of the res publica is also a key point of the volume as it is in the Bellum Civile and the author argues that Caesar purposely does not present himself as a republican contrary to commonly held views. Employing detailed philological analyses of Caesar's three books on the civil war, this work significantly advances our understanding of Caesar as author and politician.

**Equity in the Civil Law Tradition 2021-07-01**

this is a book on equity in the civil law tradition from the double perspective of legal history and comparative law it is intended not only for civil lawyers who want to better understand the role and history of equity in their own legal tradition but also and perhaps more saliently for common lawyers who are curious about why the history of equity has unfolded so differently on the
continent of europe and in latin america the author begins with the investigation of the philosophical foundations of the western notion of equity in the teachings of plato and aristotle and of how their ideas affected the works of the great attic orators chapter 2 he then addresses the way in which roman law turned this notion into a legal concept of considerable practical importance chapter 3 and how it survived the fall of rome and was later elaborated in the middle ages by civilists and canonists chapter 4 subsequently the author analyses how the notion of equity was dealt with in the modern era by legal humanists protestant and catholic theologians scholars of the usus modernus pandectarum and of roman dutch law and then by legal rationalism and the philosophers of the enlightenment chapter 5 he then deals with the history of equity on the continent since the fragmentation of the ius commune and the codifications of the nineteenth century and with its reception in latin america chapter 6 finally the author offers some closing remarks on the fundamental equivocalness or relativity as some scholars put it of the notion of equity in the civil law tradition today conclusion

*Transitional Justice in Post-Revolutionary Tunisia (2011–2013)*

Domenica Preysing offers a critical reading of transitional justice that focuses on political dynamics in post-revolutionary Tunisia from the ouster of President Ben Ali in January 2011 until the adoption of transitional justice bill in December 2013. She explores the role, structure, and characteristics of evolving transitional justice policy discourse to provide a better understanding of how by who and to what effect the policy label transitional justice is progressively filled with meaning.
shows that conflicting interpretations of both the past and the present have been both deeply embedded in and an expression of the dynamic context of domestic political transformation as old and new elites struggle over the political identity and direction of post Ben Ali Tunisia.

**Food Justice Now! 2018-07-31**

A rallying cry to link the food justice movement to broader social justice debates, the United States is a nation of foodies and food activists, many of them progressives, and yet their overwhelming concern for what they consume often hinders their engagement with social justice. More broadly, food justice now charts a path from food activism to social justice activism that integrates the two. It calls on the food focused to broaden and deepen their commitment to the struggle against structural inequalities both within and beyond the food system in an engrossing, historically grounded, and ethnographically rich narrative. Joshua Sbicca argues that food justice is more than just a myopic focus on food, allowing scholars and activists alike to investigate the causes behind inequities and evaluate and implement political strategies to overcome them focusing on carceral labor and immigration crises. Sbicca tells the stories of three California-based food movement organizations, showing that when activists use food to confront neoliberal capitalism and institutional racism, they can creatively expand how to practice and achieve food justice. Sbicca sets his central argument in opposition to apolitical and individual solutions, discussing national food movement campaigns and the need for economically and racially just food policies, a matter of vital
public concern with deep implications for building collective power across a diversity of interests

in the age of economic globalisation do art and heritage matter once the domain of elitist practitioners and scholars the governance of cultural heritage and the destiny of iconic artefacts have emerged as the new frontier of international law making headlines and attracting the varied interests of academics and policy makers museum curators and collectors human rights activists and investment lawyers and artists and economists just to mention a few the return of cultural artefacts to their legitimate owners the recovery of underwater cultural heritage and the protection and promotion of artistic expressions are just some of the pressing issues addressed by this book contemporary intersections between art cultural heritage and the market are complicated by a variety of ethical and legal issues which often describe complex global relations should works of art be treated differently from other goods what happens if a work of art currently exhibited in a museum turns out to have originally been looted what is the relevant legal framework what should be done with ancient shipwrecks filled with objects from former colonies should such objects be kept by the finders should they be returned to the country of origin this book
addresses these different questions while highlighting the complex interplay between legal and ethical issues in the context of cultural governance the approach is mainly legal but interdisciplinary aspects are considered as well

delving into the history of economic thought this book presents a picture of the mediterranean spirit of capitalism a tradition
that has its protagonists in thomas aquinas and the eighteenth century civil economy and seeks to understand its presence and relevance for contemporary societies the book argues that it is reductive to attribute to the protestant ethic the different formations of capitalism in the western world instead it is vital to acknowledge the differences in the ways in which the market is lived enterprises are created and conducted and civic life in general is understood in different regions this thought provoking study demonstrates that in southern europe the legacy of aquinas and the civil economy adds different terms to those recurring in classical and neo classical economy common good reciprocity virtue public trust mutual assistance and public happiness it is these ideas of a market as a place for mutual assistance which can be said to characterize the mediterranean spirit of capitalism thomas aquinas and the civil economy tradition will be of interest to advanced students and researchers in the history of economic thought economic philosophy christian ethics and moral theology

this book reconsiders the use of food metaphors and the relationship between law and food in an interdisciplinary perspective to examine how food related topics can be used to describe or identify rules norms or prescriptions of all kinds the links between law and food are as old as the concept of law many authors have been using such links in creative ways to express
specific features of law this is because the language of food and cooking offers legal thinkers and teachers mouth watering metaphors comparing rules to recipes and their combination to culinary processes this collection focuses on this relationship between law and food and takes us far beyond their mere interaction to explore different ways of using these two apparently so diverse elements to describe different phenomena of the legal reality the authors use the link between food and law to describe different aspects of the legal landscape in different areas and jurisdictions bringing together metaphors and indirect correlations between law and food the book explores different models of approaching legal issues and considering different legal challenges from a completely new perspective in line with the multidisciplinary approach that leads comparative legal studies today and to a certain extent revisiting and enriching it with contributions in english and french the book will be of interest to academics and researchers working in the areas of law and food law and language and comparative legal studies

categorical property law offers a transsystemic and integrated approach to common law and civil law property. Property law has traditionally been excluded from comparative law analysis common law and civil law property being deemed irreconcilable with this book ya ll emerich aims to dispel the myth that comparison between these two systems of property is impossible by establishing a dialogue between common law and civil law property. It becomes clear that the two legal traditions share common ground in the way that they address legal cultural and social issues related to property and wealth.

this authoritative commentary on the recast regulation 2019 1111 on matters of matrimonial and parental responsibility presents a deep analysis of the regulation and is authored by leading experts in family law and private international law employing a granular article by article approach the commentary acts as a detailed reference point on the uniform jurisdiction rules for divorce legal separation and marriage annulment as well as for disputes over parental responsibility with an international element including child abduction
international commercial arbitration relies extensively on the possibility of enforcing arbitral decisions against recalcitrant parties because courts and arbitration laws across the world take contrasting approaches to the definition of awards such enforcement can be problematic especially in the context of awards by consent and the recent development known as emergency arbitration in this timely and ground breaking book a young arbitration scholar takes us through the difficulties of defining the notion of arbitral award with a rare combination of theoretical awareness and attention to the procedural requirements of arbitral practice in a framework using a comparative analysis of common law and civil law jurisdictions specifically england and france and how each has regulated in different ways the equilibria between state justice and arbitral justice and comparing each with the uncitral model law the book addresses such issues as the following the judicialization of arbitration different models of arbitral adjudication and their impact on the notion of award what an award needs to contain to be enforceable awards on competence awards by consent and awards ante causam the author employs a methodology that views arbitration as providing an institution for administering justice rather than as a purely contractual creature to this end rules of arbitral institutions particularly the international chamber of commerce are examined closely for their implications on what an award means as a fresh look at the arbitral award by placing it in a broader context than is usually found this book
allows for a greater understanding of the functioning of international commercial arbitration it is sure to become an international reference and as such will be welcomed by arbitrators practitioners at global law firms companies doing transnational business interested academics and international arbitration centres in emerging markets
