Professor Litman's work stands out as well researched doctrinally solid and always piercingly well written. Jane Ginsburg Morton L Janklow Professor of Literary and Artistic Property Columbia University Litman's work is distinctive in several respects. In her informed historical perspective on copyright law and its legislative policy, her remarkable ability to translate complicated copyright concepts and their implications into plain English, her willingness to study, understand, and take seriously what ordinary people think copyright law means, and her creativity in formulating alternatives to the copyright quagmire. Pamela Samuelson Professor of Law and Information Management Director of the Berkeley Center for Law Technology University of California Berkeley In 1998, copyright lobbyists succeeded in persuading Congress to enact laws greatly expanding copyright owners' control over individuals' private uses of their works. The efforts to enforce these new rights have resulted in highly publicized legal battles between established media and new upstarts. In this enlightening and well argued book, law professor Jessica Litman questions whether copyright laws crafted by lawyers and their lobbyists really make sense for the vast majority of us. Should every interaction between ordinary consumers and copyright protected works be restricted by law? Is it practical?
to enforce such laws or expect consumers to obey them what are the effects of such laws on the exchange of information in a free society litman’s critique exposes the 1998 copyright law as an incoherent patchwork she argues for reforms that reflect common sense and the way people actually behave in their daily digital interactions this paperback edition includes an afterword that comments on recent developments such as the end of the napster story the rise of peer to peer file sharing the escalation of a full fledged copyright war the filing of lawsuits against thousands of individuals and the june 2005 supreme court decision in the grokster case jessica litman ann arbor mi is professor of law at wayne state university and a widely recognized expert on copyright law

the European Commission's proposed common consolidated corporate tax base (CCCTB) is the most ambitious project in the history of direct taxation within the EU while retaining the right of member states to set their own corporate tax rate. The proposed system allows for a one-stop shop for filing tax returns and consolidating profits and losses across the EU. In this book, the first to offer guidance to practitioners whose work will be affected by these new developments, 19 prominent representatives of the business community, tax consultancy, academic taxation scholarship, and tax administration discuss the proposed system's rationale, structure, and uncertainties ranging from very technical aspects to the wording of the proposal to political considerations. These topics include the following: eligibility formation of a group, the concept of permanent establishment, foreign tax credits, dual resident companies, consequences of entering and leaving, depreciation of fixed assets, repackaged asset transfers, appeals procedure, disagreements among member states, subsidiarity, and the yellow card procedure. International aspects and tax treaties, sharing mechanisms and transfer pricing, and anti-abuse rules. The discussion raises numerous issues likely to lead to future amendments and for this reason along with its practical value in developing an understanding of the proposed system's specific effects, the book will be welcomed by tax consultants and lawyers worldwide, corporate tax advisers, European tax authorities, and tax researchers and academics.

The United States today suffers from too much criminal law and too much punishment. Husak describes the phenomena in some detail and explores their relation and why these trends produce massive injustice. His primary goal is to defend a set of constraints that limit the authority of states to enact and enforce penal offenses. The book urges the weight and relevance of this topic in the real world and notes that most Anglo-American legal philosophers have neglected it. Husak’s secondary goal is to situate this endeavor in criminal theory as traditionally construed. He argues that many of the resources to reduce the size and scope of the criminal law can be derived from within the criminal law itself even though these resources have not been used explicitly for this purpose. Additional constraints emerge from a political view about the conditions under which important rights such as the right implicated by punishment may be infringed when conjoined; these constraints produce what
husak calls a minimalist theory of criminal liability husak applies these constraints to a handful of examples most notably to the justifiability of drug proscriptions

The book is intended to be an introductory guide for healthcare practitioners, legal practitioners, healthcare students, and law students who are concerned with the delivery of healthcare services in South Africa. The book emphasizes the ethical and legal aspects of healthcare in the country while making references to international human rights and ethical standards applicable to healthcare services. As the book is a guide, it does not deal exhaustively with the topics discussed; instead, it aims to give healthcare and legal practitioners some general guidelines.

New edition update includes an updated ethics chapter that includes a robust section on African indigenous values in the context of health care. A chapter on universal health care coverage and the NHI, the legislation, need to be reviewed and updated. A section on alternate dispute resolution, the section on research also requires updating. The case studies also need to be made more recent to include current contextually relevant issues like the life Esidimeni tragedy.
