about NASA

May 31 2023

For more than 50 years NASA has been breaking barriers to achieve the seemingly impossible at its 20 centers and facilities across the country and the only national laboratory in space. NASA studies Earth including its climate, our Sun, and our solar system and beyond. We conduct research, testing, and development to advance national aeronautics and space administration.

National Aeronautics and Space Administration

April 29 2023

NASA is an independent U.S. governmental agency established in 1958 for the research and development of vehicles and activities for space exploration. NASA was created largely in response to the Soviet launching of Sputnik in 1957 and its headquarters are in Washington D.C.

NASA History

March 29 2023
dec 11 2023  

65 years and counting forged in response to early Soviet space achievements, NASA was built on the National Advisory Committee for Aeronautics (NACA) as the locus of U.S. civil aerospace research and development. Since October 1, 1958, when NASA opened for business, it has accelerated work on human and robotic space exploration.
