Northern Lights 2016-11-01

Think tanks are often thought of as a uniquely US phenomenon although the largest concentration of think tanks is in the United States they can be found in virtually every country. Often overlooked, Canada’s think tanks represent a highly diverse and eclectic group of public policy organizations such as the Canadian Centre for Policy Alternatives, the C.D. Howe Institute, the Fraser Institute, and the Mowat Centre, among others. In Northern Lights, Donald Abelson explores the rise of think tanks in Canada and addresses many of the most commonly asked questions about how and under what circumstances they are able to affect public opinion and public policy. He identifies the ways in which Canadian think tanks often prioritize political advocacy over policy research and seeks to explain why these organizations are well suited and equipped to shape the discourse around key policy issues. The first comprehensive examination of think tanks in Canada, Northern Lights is both a primer for those looking to understand the role and function of think tanks in the policy-making process and a guide to the leading policy institutes in the country.

Uneasy Partnership 2018-01-25

In this new edition of Uneasy Partnership, Geoffrey Hale examines the interdependent relationship between Canadian governments and businesses, considering governments’ multiple roles in the economy and their implications for the business environment. Hale provides an overview of the historical dimensions of Canada’s political economy and relations between government and business. Readers are invited to consider topics such as corporate power, the implications of Canada’s economic structure, regional economic differences, the cross-cutting effects of globalization, and the role of interest groups in political and policy processes. In a thoughtful and well-researched style, Hale lays out how the partnership between business and government in Canada is an uneasy one and one whose capacity to adapt to ongoing change is essential in an uncertain world.

Navigating a Changing World 2021-04-07

The negotiation of the Canada-US Free Trade Agreement in 1985-88 initiated a period of substantially increased North American and later global economic integration. However, events since the election of Donald Trump in 2016 have created the potential for major policy shifts arising from NAFTA’s renegotiation and continuing political uncertainties in the United States and with Canada’s other major trading partners. Navigating a Changing World draws together scholars from both countries to examine Canada-US policy relations and the evolution of various processes for regulating market and human movements across national borders. The specific application of these dynamics to a cross section of policy fields with significant implications for Canadian public policy is explored. It examines the impact of territorial institutions and extra-territorial forces, institutional economic and technological among others, on interactions across national borders and the movement of goods.
services people and capital above all navigating a changing world represents the first major study to address canada’s international policy relations within and beyond north america since the elections of justin trudeau in 2015 and donald trump in 2016 and the renegotiation of nafta

Artificial Intelligence and Soft Computing
2013-06-04

the two volume set lniai 7894 and lncs 7895 constitutes the refereed proceedings of the 12th international conference on artificial intelligence and soft computing icaisc 2013 held in zakopane poland in june 2013 the 112 revised full papers presented together with one invited paper were carefully reviewed and selected from 274 submissions the 56 papers included in the second volume are organized in the following topical sections evolutionary algorithms and their applications data mining bioinformatics and medical applications agent systems robotics and control artificial intelligence in modeling and simulation and various problems of artificial intelligence

machiaevelli had it easy is an engaging text for the emerging discipline of governance gaps arise when directors and managers come together from diverse vocational and cultural languages and interests compressed information streams in the digital age yet few reconcile silos of business legal expertise and regulatory public interests for informed decisions this text presents research and a market tested decision framework for comparative law market practice and human nature in the vital strategic oversight role of governance informed by cognitive science business practice and legal duties one conclusion is that bias and self interests are instinctive but reconciling best interests is not too often lessons learned from centuries of law are overlooked the chapters are a dozen inquiries into recurring problems in the boardroom part one is an entry level technical reference of law and governance principles unique appendices of keywords and case notes will aid those new to markets governed by the western rule of law and those tripping on gaps in comparative jargon part two is a series of practical hot topics in the context of law and governance part three looks to next steps in accountability and liability the text will help accountants engineers lawyers and business operations and market policy experts from around the world work together and professors professionals and students anticipate change after drilling through accountability and liability for hybrid organizations typical crises are revealed to be from a lack of aligning interests and related information churn conclusions of the how and why of governance systems link the human condition and the rule of law in the digital age

The Director and The Manager 2022-09-09

john hannigan s definitive textbook offers a distinctive balanced coverage of environmental issues policies and action this revised fourth edition has been
expanded and fully updated to explore contemporary developments and issues within global environmental sociology environmental sociology reconciles hannigan's widely cited model of the social construction of environmental problems and controversies which states that incipient environmental issues must be identified researched promoted and persuasively argued in the form of claims with an environmental justice perspective that stresses inequality and threats to local communities for example this new edition explores the interconnections between indigenous communities and environmental activists via a study of the difficult relationship between aboriginal people and environmentalists in australia the updated fourth edition also discusses new direct action protest groups such as extinction rebellion who have reframed the discourse around the climate emergency using apocalyptic language and imagery environmental sociology also signposts exciting new directions for future research the fourth edition re interrogates the classical roots of environmental theory with a focus of the work of alexander von humboldt hannigan also asserts the need for environmental sociologists to turn their attention to the forgotten ocean arguing that the discipline should incorporate cutting edge concepts such as marine justice striated space and volumetrics environmental sociology is a key text for students and researchers in environmental studies political ecology social geography and environmental sociology

Environmental Sociology 2022-09-29

formula one has long maintained a glitzy aura that masks dark and strange goings on in the background but with the 2019 season came a force louder than formula one could dream of muffling william storey the founder of british energy drink startup rich energy storey became a multimillion dollar sponsor of the haas formula one team a year after records showed rich energy having a mere 770 in the bank he equated his doubters to moon landing truthers and publicly mocked both the haas team and the entities winning legal disputes against him but where were actual cans of rich energy and did the supposed sponsorship funds exist in the six months between storey's first race as a formula one sponsor and his very public exit he stole the spotlight with a loud mouth and an active twitter account haas team boss guenther steiner once described the rich energy news cycle as i'm getting sick of answering these stupid fucking questions on a race weekend i've never seen any fucking thing like this no one else had either this book uncovers the complete bizarre story

Racing with Rich Energy 2013-12-17

this book is composed of the proceedings of the international conference on advanced computing networking and informatics icacni 2013 held at central institute of technology raipur chhattisgarh india during june 14 16 2013 the book records current research articles in the domain of computing networking and informatics the book presents original research articles case studies as well as review articles in the said field of study with emphasis on their implementation and practical application researchers academicians practitioners and industry policy makers around the globe have contributed towards formation of this book with their valuable research submissions
Intelligent Computing, Networking, and Informatics  
2013-06-05

This book constitutes the thoroughly refereed proceedings of the 21st international conference on user modeling adaption and personalization held in Rome, Italy in June 2013. The 21 long and 7 short papers of the research paper track were carefully reviewed and selected from numerous submissions. The papers cover the following topics: recommender systems, student modeling, social media and teams, human cognition, personality, privacy, web curation, and user profiles. Travel and mobile applications and systems for elderly and disabled individuals.

User Modeling, Adaption, and Personalization  
2013-06-03

This book constitutes the refereed proceedings of the 6th international conference on brain inspired cognitive systems (BICS 2013) held in Beijing, China in June 2013. The 45 high-quality papers presented were carefully reviewed and selected from 68 submissions. BICS 2013 aims to provide a high level international forum for scientists, engineers, and educators to present the state of the art of brain inspired cognitive systems research and applications in diverse fields.

Advances in Brain Inspired Cognitive Systems  
2021-12-21

Rooted in thousands of pages of access to information documents and dozens of interviews carried out throughout Latin America, Blood of Extraction examines the increasing presence of Canadian mining companies in Latin America and the environmental and human rights abuses that have occurred as a result. Following the money, Gordon and Webber illustrate the myriad ways Canadian-based multinational corporations backed by the Canadian state have developed extensive economic interests in Latin America over the last two decades at the expense of Latin American people and the environment. Latin American communities affected by Canadian resource extraction are now organized into hundreds of opposition movements from Mexico to Argentina, and the authors illustrate the strategies used by the Canadian state to silence this resistance and advance corporate interests.

Brain-Computer Interfaces for Perception, Learning, and Motor Control  
2016-12-07T00:00:00Z

This book presents the proceedings of the IUPESM World Biomedical Engineering and Medical Physics triennial high level policy meeting dedicated exclusively to furthering the role of biomedical engineering and medical physics in medicine. The book offers papers about emerging issues related to the development and sustainability of the role and impact of medical physicists and biomedical engineers in medicine and healthcare. It provides a
unique and important forum to secure a coordinated multileveled global response to the need demand and importance of creating and supporting strong academic and clinical teams of biomedical engineers and medical physicists for the benefit of human health

our everyday life is characterized by a multitude of emotionally relevant cues that we perceive and communicate via various sensory channels this does not only encompass the obvious cases of auditory and visual modalities but also olfactory gustatory and even tactile stimuli any kind of emotional situation in a natural setting is usually a multimodal experience a friend welcomes us with warm words a smile and a happy voice the sight of our favourite food is accompanied by a seductive smell and a delicious taste the thrill of watching an exciting movie scene is intensified by a gripping soundtrack in these situations the signals from various senses do not stand on their own they interact and create a unified emotional experience recent neuroscientific research has begun to accommodate this inherent multimodality of emotions in natural situations by studying the interaction of affectively relevant information from more than one sensory channel fascinating new aspects emerge concerning the neurobiology of emotion processing and there is
evidence that integrating emotional cues from various sources invokes brain processes that go beyond the well known patterns observed during unimodal stimulation the aim of this volume is to present novel and interesting studies dealing with the multimodality of emotions and their neural processing this includes findings from novel paradigms beyond the classical stimulus response pattern fascinating new insights into the interaction of the chemical senses new analysis methods comprehensive reviews of selected topics multimodality in social interactions and clinical perspectives taken together the studies of this volume thus help us to better understand the interplay of various senses in our daily emotional experiences

current theories of visual change detection emphasize the importance of conscious attention to detect unexpected changes in the visual environment however an increasing body of studies shows that the human brain is capable of detecting even small visual changes especially if such changes violate non conscious probabilistic expectations based on repeating experiences in other words our brain automatically represents statistical regularities of our visual environmental since the discovery of the auditory mismatch negativity mmn event related potential erp component the majority of research in the field has focused on auditory deviance detection such automatic change detection mechanisms operate in the visual modality too as indicated by the visual mismatch negativity vmmn brain potential to rare changes vmmn is typically elicited by stimuli with infrequent deviant features embedded in a stream of frequent standard stimuli outside the focus of attention in this research topic we aim to present vmmn as a prediction error signal predictive coding theories account for phenomena such as mismatch negativity and repetition suppression and place them in a broader context of a general theory of cortical responses a wide range of vmmn studies has been presented in this research topic twelve articles address roughly four general sub themes including attention language face processing and psychiatric disorders additionally four articles focused on particular subjects such as the oblique effect object formation and development and time frequency analysis of vmmn furthermore a review paper presented vmmn in a hierarchical predictive coding framework each paper in this research topic is a valuable contribution to the field of automatic visual change detection and deepens our understanding of the short term plasticity underlying predictive processes of visual perceptual learning

with recent developments and advancements as well as case histories field monitoring experimental characterization physical and analytical modelling and applications related to the variety of environmental phenomena induced by earthquakes in soils and their effects on engineered systems interacting with them the book is divided in the sections below invited papers keynote papers theme lectures special session on large scale testing special session on liquefact projects special session on lessons learned from recent earthquakes special session on the central italy earthquake regular papers earthquake geotechnical engineering for protection and development of environment and constructions provides a significant up to date collection of recent experiences and developments and aims at engineers geologists and seismologists consultants public and private contractors local national and international authorities and to all those involved in research and practice related to earthquake geotechnical engineering

Advances in sea state modeling and climate change impacts 2017-09-08

In this authoritative work Seiler and Seiler argues that the establishment and development of moviegoing and movie exhibition in prairie Canada is best understood in the context of changing late nineteenth century and early twentieth century social economic and technological developments from the first entrepreneurs who attempted to lure customers in to movie exhibition halls to the digital revolution and its impact on moviegoing reel time highlights the pivotal role of amusement venues in shaping the leisure activities of working middle class people across North America as marketing efforts the lavish interiors of the movie palace and the romantic view of the local movie theatre concealed a competitive environment in which producers exhibitors and distributors tried to monopolize the industry and drive their rivals out of business the pitched battles and power struggles between national movie theatre chains took place at the same time that movie exhibitors launched campaigns to reassure moviegoers that theatres were no longer the unclean and immoral places of amusement of yesteryear under the leadership of impresarios the movie theatre rose up from these attacks to become an important social and cultural centre one deemed suitable for women and children an innovative examination of moviegoing as a social practice and movie exhibition as a commercial enterprise reel time depicts how the industry shaped the development of the Canadian prairie west and propelled the region into the modern era Robert M Seiler is associate professor emeritus in communication and culture at the University of Calgary Tamara P Seiler is professor emeritus of Canadian studies at the University of Calgary reel time is their second joint publication

every day we hear stories about the consequences of human frailties for individuals their families and friends and their organizations some of these stories are about alcohol and drug addiction and other harmful lifestyle choices but human frailty also leads to all kinds of unethical and illegal behaviour individuals are convicted of bribery and corruption price fixing
theft and fraud sexual harassment and abuse of authority politicians fiddle their expenses sports people cheat and fix matches and school and university students and teachers cheat to enhance exam results studies have shown that business students cheat more than others and efforts to teach ethical behaviour in business schools make little difference the media who bring us stories of others frailties themselves engage in unethical and illegal conduct in pursuit of an edge over their rivals the contributions to this latest addition to gower’s psychological and behavioural aspects of risk series place the spotlight on individuals their behavioural choices and the consequences that follow for theirs and others lives and careers the conclusion is that people do have choices and options and that whilst there are no easy or quick fixes in addressing self limiting behaviours successful avoidance of the worst outcomes can been achieved this book provides guidance on the practical steps that need to be taken in order to gain a sense of proportion of what is important and of how we are doing if we are to address our frailties and stop making unethical choices

Berkeley Problems in Mathematics 2014-05-30

this special edition of neurodevelopment and intelligence contains both volumes one and two the set provides an understanding neurodevelopmental risks during fetal and early life and of the things that can go awry that limit or hinder healthy brain development leading to a loss of intellectual abilities or causing disabilities such as autism spectrum disorder it should be of interest to anyone interested in brain health preventive medicine pediatrics public health policy present and prospective parents and those planning on pregnancy and parturition herein dr lewis explains how people got smarter for more than a century and why the alternative title of the book is swimming in a poisoned pond the looming demise of cognitive and mental health in america how any healthy child can be a genius with advanced planning all the nasty things in your home that cause brain damage the disgusting things in your water that harm the brain the prenatal vitamins that prevent autism how adhd is a lifestyle disease the eight pillars of health and their effects on the brain what men can do to sire smarter children the environmental toxins that cause violent crime and suicide how to make your home safe for your child’s brain the role of gut bacteria on the brain how to make pregnancy safer for the fetal brain foods that improve brain function maternal life style factors that affect iq the seven pillars of health and its functioning the harmful effects of poverty on the brain how noise and noise pollution harm brain development how good public policy can give us a brighter future foods that improve brain function and make us happy and engaged the effects of exercise and environmental enrichment kiss your genetic legacy goodbye why you will likely never be a grandparent if you don’t already have children how stress makes us stupid why people are getting dumber even though we have better medical care and more access to education are we already too dumb to save ourselves from our mistakes how psychopathic corporations stupidity and structural racism
raid america's wealth the book is a serious scientific exploration of neurodevelopment on which policy and personal behavior changes can be based to improve health happiness and intellectual curiosity section i section lays out an description of the intelligence quotient iq and why it can used as a proxy for neurodevelopment it explains iq tests and other developmental scales scoring and some of their limitations the high metabolic cost of a large brain and the survival advantage provided by epigenetic adaptation to downsize the brain to the current environmental conditions is described explaining why a less costly and less intelligent brain are adaptive to leaner times an estimate is made for the average human iq in full health and nutrition about two standard deviations above the current average or an iq of 130 a primer on inflammation is given section 2 discusses the impact of anemia and iron on brain development topics include hookworm malaria and infections most of this section discusses iron deficiency iron supplementation in pregnancy and infancy and the role other minerals and vitamins required for blood formation section 3 covers the role of iodine and thyroid hormone on neurodevelopment the following chapters discuss thyroid hormone disruptors including fluoride and bromide organohalogenes thyroid disrupting organic pollutants organophosphates and other biocides and foods and food additives that impact thyroid function section 4 covers neurotoxic metals in the environment the neurotoxic metals that most commonly impact brain health are discussed including arsenic lead mercury manganese the impacts of cadmium and aluminum on fetal and infant health are reviewed toxic metal exposure during development most commonly occurs from water contamination and chapter 18 covers water filtration for removal of these toxins section 5 discusses the role of toxic metals dietary factors and the role of the intestinal microbiome on the causation and exacerbation of autism spectrum disorder evidence on the role of special diets for asd is reviewed the timing of the development of asd is discussed as it is essential to understanding which exposures are relevant and amenable to treatment section 6 discussed the generation of air pollution from combustion of fuels and the adverse impacts of it on brain health effects of particulate matter pm on health alzheimer's and parkinson's disease are reviewed along with its effects on the premature birth of infants neurodevelopment iq and autism mitigation of risk is discussed section 7 outlines maternal factors that impact neurodevelopment and intelligence the causes and effects of preterm birth and small for gestational age are explored with a particular focus on environmental influences section 8 covers the effect of general health on neurodevelopment including the impact of diet on the intestinal microbiome exercise sleep deprivation sleep disordered breathing and explains the roll of lifestyle in adhd section 9 discusses the effects of psychosocial stress on neurodevelopment and intellectual performance and discusses the epigenetic effects of stress on brain development and behavior the role of having a supportive social environment a stimulating environment and education on brain development iq an health are discussed the effects of prenatal stress on the brain are reviewed other topics include the effect of stress and telomere length the effects of poverty or domestic violence on iq score and the effects of stress on the hypothalamic pituitary adrenal axis and on the gut the effects of noise on hearing academic performance and sleep are reviewed the need to confront endemic stress as a societal norm is discussed
twenty years after nafta the consensus seems to be that the regional project in north america is dead the trade agreement was never followed up by new institutions that might cement a more ambitious regional community the security and prosperity partnership spp launched with some fanfare in 2005 was quietly discontinued in 2009 and new cooperative ventures like the us canada beyond the border talks and the us mexico merida initiative suggest that the three governments have reverted to the familiar pre nafta pattern of informal incremental bilateralism one could argue however that nafta itself has been buried and yet the region somehow lives on albeit in a form very different from regional integration in other parts of the world a diverse group of contributors from the united states canada and mexico with experience in academia government service think tanks and the private sector bring to bear a sophisticated and much needed examination of regional governance in north america its historical origins its connection to the regional distribution of power and the respective governments domestic institutions and the variance of its forms and function across different issue areas the editors begin by surveying the literature on north american regional politics matching up developments there with parallel debates and controversies in the broader literatures on comparative regional integration and international policy coordination more generally six contributors later explore the mechanisms of policy coordination in specific issue areas each with an emphasis on a particular set of actors and with its own way of characterizing the relevant political and diplomatic dynamics chapters on the political context for regional policy coordination follow leading to concluding remarks on the future of north america at a time when scholarly interest in north america seems to be waning even while important and interesting political and economic developments are taking place this volume will reinvigorate the study of north america as a region to better understand its past present and future

Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions 2013

contemporary business third canadian edition is a comprehensive introductory course rooted in the basics of business this course provides students a foundation upon which to build a greater understanding of current business practices and issues that affect their lives a wide variety of global issues ideas industries technologies and career insights are presented in a straightforward application based format written in a conversational style and edited for plain language contemporary business ensure readability for all students including students for whom english is their second language the goal of this course is to improve a student s ability to evaluate and provide solutions to today s global business challenges and ultimately to thrive in today s fast paced business environment
Reel Time 2022-02-11

in fall 2015 the newly elected trudeau government endorsed the paris agreement and promised to tackle global warming in 2016 it released a major report which set out a national energy strategy embracing clean growth technological innovation and carbon pricing rather than putting in place tough measures to achieve the paris targets however the government reframed global warming as a market opportunity for canada s clean technology sector the big stall traces the origins of the government s climate change plan back to the energy sector itself in particular big oil it shows how in the last fifteen years big oil has infiltrated provincial and federal governments academia media and the non profit sector to sway government and public opinion on the realities of climate change and what needs to be done about it working both behind the scenes and in high profile networks canada s energy companies moved the debate away from discussion of the measures required to create a zero carbon world and towards market based solutions that will cut carbon dioxide emissions but not enough to prevent severe climate impacts this is how big oil and think tanks unraveled the kyoto protocol and how rachel notley came to deliver the business council of canada s energy plan donald gutstein explains how and why the door has been left wide open for oil companies to determine their own futures in canada and to go on drilling new wells building new oil sands plants and constructing new pipelines this book offers the background information readers need to challenge politicians claiming they are taking meaningful action on global warming

likely to raise hackles among democrats and republicans alike this dynamic history of modern florida argues that the sunshine state has become the political and demographic future of the nation david colburn reveals how florida gradually abandoned the traditions of race and personality that linked it to the democratic party the book focuses particularly on the population growth and chaotic gubernatorial politics that altered the state from 1940 when it was a sleepy impoverished southern outpost to the present and the emergence of a dominant republican party

Neurodevelopment and Intelligence: Impacts of Nutrition, Environmental Toxins, and Stress (Volumes 1 and 2) 2014-10-30

the innovative progress in the development of large and small scale parallel computing systems and their increasing availability have caused a sharp rise in interest in the scientific principles that underlie parallel computation and parallel programming the biannual parallel architectures and languages
Europe Parle Conferences aim at presenting current research material on all aspects of the theory design and application of parallel computing systems and parallel processing at the same time. The goal of the Parle conferences is to provide a forum for researchers and practitioners to exchange ideas on recent developments and trends in the field of parallel computing and parallel programming. The first two conferences, Parle 87 and Parle 89, have succeeded in meeting this goal and have made Parle a conference that is recognized worldwide in the field of parallel computing. Parle 91 again offers a wealth of high-quality research material for the benefit of the scientific community. Compared to its predecessors, the scope of Parle 91 has been broadened to cover the area of parallel algorithms and complexity in addition to the central themes of parallel architectures and languages. The proceedings of the Parle 91 conference contain the text of all contributed papers that were selected for the programme and of the invited papers by leading experts in the field.

**Regional Governance in Post-NAFTA North America 2019-12-09**

Managing federalism through pandemic summarizes and analyses multiple policy dimensions of Canada's response to the COVID-19 pandemic and related policy issues from the perspective of Canadian federalism. Contributors address the relative effectiveness of intergovernmental cooperation at the summit level and in policy fields including emergency management, public health, national security, indigenous peoples and governments, border governance, crisis communications, fiscal federalism, income security policies, CEBA, supply chain resilience, and interacting energy and climate policies. Despite serious policy failures of individual governments, repeated fluctuations in the overall effectiveness of pandemic management, and growing public frustration across provinces and regions, contributors show how processes for intergovernmental cooperation adapted reasonably well to the pandemic's unprecedented stresses, particularly at the outset. The book concludes that despite individual policy failures, Canada's decentralized approach to policy management often enabled regional adaptation to varied conditions, helped to contain serious policy failures, and contributed to various degrees of policy learning across governments. Managing federalism through pandemic reveals how the pandemic exposed structural policy weaknesses which transcend federalism but have significant implications for how governments work together or don't to promote the well-being of citizens.
