what is an app types of apps and examples indeed com

May 30 2023

mar 10 2023 an app which is short for application is a type of software that can be installed and run on a computer tablet smartphone or other electronic devices an app most frequently refers to a mobile application or a piece of software that is installed and used on a computer most apps have a specific and narrow function
An application, also referred to as an application program or application software, is a software program that runs on your computer. Browsers, e-mail programs, word processors, games, and utilities are all applications. The word application is used because each program has a specific application for the user. For example, a word processor can help a student.

Quicktime content filter, spreadsheet, browser: See all related content. Application software: Software designed to handle specific tasks for users. Such software directs the computer to execute commands given by the user and may be said to include any program that processes data for a user.

An application is software that fulfills a specific need or performs tasks. System software is designed to run a computer's hardware and provides a platform for applications to run on top of.

An application, also referred to as an application program or application software, is a software program that runs on your computer. Browsers, e-mail programs, word processors, games, and utilities are all applications. The word application is used because each program has a specific application for the user. For example, a word processor can help a student.
application software is a computer software package that performs a specific function directly for an end user or in some cases for another application an application can
