First Overland 2016-03-07 why not after all no one had ever done it before it would be one of the longest of all overland journeys half way round the world from the english channel to singapore they knew that several expeditions had already tried it some had got as far as the deserts of persia a few had even reached the plains of india but no one had managed to go on from there over the jungle clad mountains of assam and across northern burma to thailand and malaya over the last 3000 miles it seemed there were just too many rivers and too few roads but no one really knew in fact their problems began much earlier than that as mere undergraduates they had no money no cars nothing but with a cool audacity which was to become characteristic they set to work wheedling and cajoling first they coaxed the bbc to come up with some film for a possible tv series they then gently persuaded the manufacturers to lend them two factory fresh land rovers a publisher was even sweet talked into giving them an advance on a book by the time they were ready to go their sponsors more than 80 of them ranged from whiskey distillers to the makers of collapsible buckets in late 1955 they set off seven months and 12000 miles later two very weary land rovers escorted by police outriders rolled into singapore to flash bulbs and champagne now fifty years on their book first overland is republished with a foreword by sir david attenborough after all it was he who gave them that film

The Design Student's Handbook 2015-07-17 what is design what are the main design disciplines and how do they interrelate how does design theory and context help you improve your studio work what do you need to know by the end of your course to get a good career what can you do to become a knowledgeable designer and improve your skills so that you stand out from the crowd whether you are already studying design thinking about choosing a course or are well on your way to finding your first job this essential and uniquely comprehensive book will introduce you to the world of design and support you throughout your studies and on into the industry key features develops your core skills and supports you in making the most of your studies describes the multi disciplinary design world by exploring the various design disciplines graphics fashion and textiles three dimensional design craft spatial interactive media and theatre film and television contains crucial practical information so you're ready for your career placements working with industry and self employment networking job seeking and how to succeed in your own business covers the key practical theoretical and cultural fundamentals of design to help you understand and inform your practice chapters on creativity and innovation history culture and context how to communicate design colour theory aesthetics and how to design with ethical social and responsible considerations comprises chapters written by designers and lecturers all experts in their fields includes stories career profiles and first hand quotes by students established designers and industry specialists exploring what it's like to study and to work in the design industry today identifies important books and websites for further reading the design student's handbook will guide you along the road to a successful and fulfilling career and is an essential text for studying any of the design disciplines

Big Book of Land Rover 2014-01-01 the second world war proved among other things the value of a basic 4 wheel drive vehicle of rugged construction the success of the american jeep inspired the wilkes brothers maurice and spencer who ran the rover car company that a british version was likely to be well received launched in 1948 customers were never in short supply for their creation the land rover although there were some unexpected owners for such a
sparse and utilitarian car including king george vi and winston churchill once
the british army embraced it as their vehicle of choice the land rover s place
in motoring s hall of fame was secured since those days the company has gone on
to invent the concept of the luxury 4x4 with the launch of the range rover in
1970 and has added further to the distinguished stable with the discovery and
the freelander the land rover has truly conquered the globe find out how inside
The International Vehicle Aerodynamics Conference 2014-11-12 aerodynamics has
never been more central to the development of cars commercial vehicles
motorbikes trains and human powered vehicles driven by the need for efficiency
reducing carbon dioxide emissions reducing fuel consumption increasing range
and alleviating problems associated with traffic congestion reducing vehicle
weight makes it more challenging to ensure that they are stable and handle well
over a wide range of environmental conditions lighter structures are also more
vulnerable to aerodynamically induced vibration alongside this customers demand
an environment that is quiet comfortable and maintains their vision of the
world around them in all weathers these aims must be met by designing vehicles
that engage customers emotionally promoting the brand values of manufacturers
and operators this can only be done by collaboration between designers and
aerodynamicists examine the latest developments in vehicle aerodynamic
development explore opportunities to network and share experiences around
different areas focus on future challenges and the engineering knowledge and
technology required to resolve them discuss other areas of development
including handling and stability tyre aerodynamics and modelling aeroacoustics
and fluid structure interaction
Mars Rovers (A True Book: Space Exploration) 2022-04-19 from the first time a
person looked up at the sky and wondered what s out there humans have dreamed
about exploring the cosmos this book is part of a series a true book space
